**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-18 and 27-40 are rejected under the judicially created doctrine of double patenting over claims 1-26 of U. S. Patent No. 6,614,776 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Art Unit: 2684

As admitted by applicant in applicant's remarks (dated 8/4/03), claims 1-18 and 27-40 of the existing application differ from the parent case US Patent # 6,614,776 simply in that they have been amended to broaden the preamble to include a wireless system rather than the existing "CDMA" language.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

***Allowable Subject Matter***

Claims 19-26 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 19, the prior art of record fails to specifically disclose a wireless communication system, at least one of a base station and a subscriber station comprising: a local transmitter having a physical layer processor comprising: a source signal including data; an FEC (Forward Error Correction) coder to receive the source signal and produce an enhanced source signal including data coded with error correction information; a demultiplexer coupled to receive the enhanced source signal from the FEC coder; a plurality of modem processors, each of which is coupled to a unique output of the demultiplexer to process respective portions of the enhanced source signal in independent channels; a summer coupled to receive outputs of the modem processors to produce an aggregate signal, the aggregate signal being an summation of

the enhanced signal processed in independent channels; and a transmitter to transmit the aggregate signal over a carrier frequency; and a local receiver having a physical layer processor comprising: a receiver that receives a wireless signal from a remote transmitter, the wireless signal being formed at the remote transmitter by a summation of portions of a coded signal that were processed in independent channels but were wirelessly transmitted as a single aggregate signal; a plurality of demodulators coupled to receive an output of the wireless receiver; and a multiplexer coupled to direct an output of the demodulators to an FEC (Forward Error Correction) decoder to recover a single unitary information signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
